

Kelsey Tucker	My boyfriend's family cant get it at their house and I practically live there now. All the other friends we have in DeSoto can get DSL and even PARTS OF SUMMERSET itself can get DSL.. (have had a neighbor in the community get it once.) It's ridiculous that ALL of the neighborhood cant have it.
Steven Hohlt	Ive been checking for the last 4 years since we moved into Summer Set and even ATT has promised we would get the service, and yet here we are 4 years still and when you call their service they say WE HAVE PLANS but dont know when, well I'm tired of waiting and I even work for ATT Wireless now, that said its time to bring this place up to speed and get something done!
Paul Minarich	Currently use WildBlue. Operate business out of house. DSL is a MUST for VOIP needs
Ryan Bernacki	I have been requesting, and checking almost daily on att.com to see if DSL is available at Summerset. I am very glad to see a petition started to get the community brought up-to-date.
Andrew Portell	A few years ago the cabinet that servers Summerset Lake was upgraded. I was told by techs working at the cabinet that DSL would be easy to turn up to the area. I know of several people that have DSL on E highway and have heard that there may be some DSL customer on Klondike RD.
Keith Johnson	We need DSL availability in our community.
